92. What is nl2br?
93. Difference between vprint, vfprint and vsprintf.
94. Difference between str and substr.
95. Define functions:
    - Strlen()
    - Str_replace()
    - Strtoupper()
    - Ucfirst()
    - Trim()
    - Ltrim()
    - Rtrim()
    - Nl2br()
    - Substr()
    - Substr_compare()

- Strops()
- Stripos()
- Str_pad()
- Bin2hex()
- Str_word_count()
- Substr_count()
- Substr_replace()
- Wordwrap()
- Vprintf()
- Vsprintf()
- Ucwords()
- Vfprintf()

96. Difference between i++ and ++i .
97. Print * in pyramid using for loop.
98. Difference between while and for loop.
99. What is mktime function? What are the keywords of mktime()?
100. Functions of array:
- Print_r()
- Implode()
- Explode()
- Count()
- Range()
- Max()
- Min()
- Array_rand()
- Array_shift
- Array_unshift()
- Array_push()
- Array_pop()
- Array_sort()
- Array_reverse()
- Array_merge()
- Array_diff()
- Array_product()

101. How many types of arrays in PHP?
102. Difference between implode() and explode().
103. What is array_push() and Array_pop?
104. What is associative array? Example.
105. Explain any 10 array Functions.
106. Difference between include() and require().
107. Difference between include() and include_once().
108. Difference between require() and require_once().
109. What is Query String? Why it is used?

110. How to redirect value from one page to another without using database and session?
111. How to redirect http using PHP?
112. What is header function?
113. What is header location?
114. Why use ISSET()?
115. What is SDLC?
116. What is Flowchart and how to work with flow chart?
117. What is ER-Diagram?
118. What is DFD and its types?
119. What is Sequence Diagram?
120. Which function is used for upload the file
121. Name the keywords used in file upload and write their functions.
122. By default how much data we can upload into the database?
123. HTML base Security
124. How to protect website or web page?
125. How to protect admin panel or admin password.
126. Why use max length in form attribute?
127. Why use my SQL_real_escape_String function? Benefit?
128. What is captcha? Why we use captcha?
129. How to disable back button?
130. How to get User Value?
131. Diff b/w session and cookies
132. Cookies syntax
133. How we set permanent cookie
134. Howto retrieve data?
135. How to delete data?
136. How to create database with syntax?
137. By default,how many tables are insert in php admin?
138. How to Connect my SQL & PHP?
139. Difference between DBMS and RDMS
140. Diff. b/w SQL and MYSQL.
141. How to create Database
142. Is MySQL support RDBMS
143. Types of My_SQL error
144. How to insert value or Insert Query in My_SQL?
145. Difference b/w Delete and Drop method with syntax
146. How many types of function to fetch data from table in MY_SQL?
147. Difference b/w array and object method?
148. Difference B/w Row and Associative method?
149. How to print data from Database into table?
150. Why we use while loop in data fetching?
151. Find 2nd Max. Salary into my SQL
152. Diff. b/w group and order by clause?

153. Types of mysql function
154. Write a syntax of update Query (Change Password)
155. Write a Syntax MIN and MAX
156. What is NOT in() Function?
157. Types of clauses
158. Difference B/w *%_* , *%_%* and *_%* ?
159. Can we make Search engine through database?
160. What is purpose of LIKE keyword?
161. When we host our project as a live status then error comes "header already sent" then how we resolve this error?
162. What is join?
163. Difference b/w inner join,right join and left join ?
164. Diff. b/w Primary & foreign key?
165. ID automatically increase so How is it Possible?
166. What is NULL value or Default Value?
167. What is SQL injection?
168. How to use LIMIT keyword in mysql?
169. How to import and export database?
170. Can I create New User in mysql?
171. Can we change table name or column name in mysql?
172. Diff. b/w mysql and mysql I ?
173. How to change user privilege?
174. What is MySQL having Clause?
175. Diff. b/w public_html and www?

(Javascript)

176. How we know the current time/date in javascript?
177. How to disable right click on web page using javascript/CSS?
178. How to disable Back button Web browser using javascript?
179. WAP to add two numbers using js. Value must be enter from user
180. How we embed calendar using js?
181. How many types of php error detectection and why they come?explain?
182. Can the same id on two fields run?if value overlapped then what comes?
183. Validation of First,Middle and last name
184. Display error msg if value enter less or above as a condition minlength=5, maxlength=15
185. Define Web hosting,?
186. Define file host?
187. Define FTP?
188. How C-panel work?
189. What is Domain and Domain Hosting?
190. What is .htxx file?
191. What is SDLC? Which model use in Project and why we not use other Models in Project?

192.   What is jquery?
193.   How to embed jquery?
194.   Which are the Current library files used in jquery?
195.   Write the predefined jquery function names? (approx. 10 to 20 names)
196.   Using jquery, effective login panel can be made or not?
197.   How to use jquery advertisement?
198.   Current version of wordpress.
199.   Difference between plugin and widgets.
200.   What is CMS? And write list of CMS. Explain.

Any Doubt – Shwetankkg@gmail.com
